Re: Request for Radiological Risk Assessment,  
RF-HED-92-0842

Dear Mr. Lee:

In a letter to Ted Bittner dated October 28, 1992 (92-RF-12698), a radiological risk assessment was described that addressed usage of personal protective equipment for the Solar Ponds project. Halliburton NUS (HNUS) has not received this document, and requests that a copy of the detailed radiological risk assessment be provided to the Broomfield office. This information would be valuable for HNUS to define criteria utilized to determine the HNUS worker\subcontractor health protection program; to establish exposure data files for the project; to answer employees' questions regarding work on the project; and to document personal protective equipment requirements for operating procedures.

Thank you for your assistance in this matter.

Sincerely,

HALLIBURTON NUS ENVIRONMENTAL  
CORPORATION

  
John A. Schmidt  
Deputy Project Manager
